## World's Grain Exhibition and Conference

### Farmers Will Win \$210,750.00 in Prizes

The World's Grain Exhibition and Conference offers Canadian farmers an opportunity to share in cash prizes amounting to \$210,750.00. Competed in 50 competitive classes, open to the whole world, are 1,701 cash prizes. A few of the major awards follow:

- \$2,500 a first prize for 50 pounds of wheat, 30 pounds of oats.
- \$1,500 for 40 pounds of barley, 30 pounds of rye.
- \$ 800 for 10 ears of corn.
- \$ 300 for 30 pounds of peas, 30 pounds of flax, 30 pounds of clover.

With this splendid opportunity before them, Canadian farmers should keep a watchful eye on their growing crops. They should mark for special care those areas that appear most promising. It should be understood that all seed and grain samples, if they are not already selected, will have to be found in crops of this year. All exhibits must be received by the Exhibition authorities on or before March 1, 1932.

Of vital importance to the advancement of Canadian agriculture will be the winning of World Championships in 1930 by farmers of Canada. Their seed and grain exhibits must demonstrate to the world the quality of Canada's field crops.

Select the classes from the prize list most suited to the crop you grow, then select your samples from the best you have. It is best to make your entry NOW.

Your samples for exhibit must be in the hands of the Secretary at Regina on or before March 1, 1932.

Valuable information relating to the preparation of grain and seed for exhibit may be secured by writing to the Secretary of the Provincial Committee, World's Grain Exhibition and Conference, care Department of Agriculture, your own province.

Show what you grow and share what you know.

On application, the Secretary, World's Grain Exhibition and Conference, Imperial Building, will send you one or more last rules and regulations governing competitive entries and all other information.

Chairman National Committee  
HON. ROBERT WEIR  
Minister of Agriculture for Canada

Chairman Executive and  
HON. W. C. BUCKLE  
Minister of Agriculture for Saskatchewan

## Lorne Proudfoot M.L.A. Meets Members of Oyen Board of Trade

Outlines Government Highway program for present year. Members of board air views on routing highway.

Mr. Lorne Proudfoot, M.L.A. who was an Oyen visitor yesterday, spent an hour in the afternoon with members of the Oyen board of trade, in the Alberta Hotel dining room.

Mr. Thomas Lees, president of the organization, told the members that Mr. Proudfoot had expressed a wish to meet the members and have an informal talk on matters of local interest, more particularly, the highway program, and he had accordingly called a meeting and was very gratified at the representative gathering present on such short notice.

Mr. Proudfoot, gave an interesting outline of the government's road building program and told of the work done on the highway between Manson and Hanna, and Hanna and Dubson. He showed a keen interest in the endeavors of the board of trade to establish a swimming pool for the young people, south of town, and thought it was a fine thing to have such a place within easy reach of town. He referred to the acquisition by the government of certain lakes and park lands as public pleasure resorts but was not prepared to say that a project such as our local one, would, at the present time, be taken over by the government, or receive departmental

## M. D. of Cereal

The council of the municipal district of Cereal met in Oyen on Saturday, June 13, at 10 o'clock a.m. Members all present.

The financial statement for the month of May was read and accepted.

Representatives from the Salvation Army, the Richardson Road Machinery Co. and the District Engineer interviewed the council.

The council decided to make a grant of \$25.00 to the Salvation Army and to the Canadian Red Cross.

The secretary was instructed not to add penalties to the tax as to the amount of the road work accounts that were in the municipal office on July 1.

The reserve price was set on several parcels which were to be offered for sale by public auction.

The road work and general accounts were passed. Council agreed to rent the S.W. 28 26, 4, to Russell Black for pasture in 1931.

The secretary was instructed to ascertain the cost of a road allowance along the northern boundary of the S.W. 28 26, 4. The council ordered several parcels exempted from Wild Lands tax.

The reserve and secretary were authorized to borrow for school purposes and make second quarterly payments to schools.

A public sale of lands was held under the Tax Recovery Act 1929.

The matter has been referred to the Town Planning Commission, and Mr. Proudfoot expressed his willingness to do everything possible to help the project.

Referring to the final location of the highway at or near Oyen our member stated that he did not know where it would be, as the final survey had not yet been made east of Cereal. Members present were invited to express their opinions relative to the location of the highway, and it was very evident that the policy of cutting out certain towns and constructing a speed way for transient traffic rather than a highway, primarily as an artery of trade for the benefit of the communities on the route, was not viewed with favor and the hope was expressed that Mr. Proudfoot would do everything possible to keep the highway in his constituency, at least touching the towns en route.

The members present expressed their pleasure meeting the member for Acadia and hoped that he would be a more frequent visitor.

After the meeting Mr. Proudfoot drove out to the swimming pool accompanied by Mr. Thomas Lees and Mr. A. O. MacArthur.

## M. D. Golden Centre

The fifth meeting of the municipal district of Golden Centre No. 272, was held at the N.E. 13-20-5, 4, on Saturday, June 6. Members all present.

The Alberta Assessment Commission advised the council that the assessed value of land within our district to be \$1,576,840 and the rate of taxation was fixed at 10 mills on the dollar.

J. W. Robinson was advised that a roadway could not be built north of S.E. 13-20-5 at present, but a survey will be made when the surveyor is in the district.

(Continued on page 2.)

# THE OYEN NEWS

## Aim Of Marketing Committee To See That Producers Obtain More Of Value Consumers Pay

Directing its attention to the marketing of farm products, the House of Commons committee on agriculture heard from Robert Weir, Minister of Agriculture, outline his suggestions as to how the committee should proceed. He urged that the attention of the committee should be first devoted to the marketing of dairy, bacon and poultry products, as these could be disposed of more expeditiously than the other elements involved in the problem. Later the committee could take up questions concerned with wheat and livestock.

The first aim of the committee is to see if we can make it possible for the producers to get more of the value which the consumer pays at the present time," he said.

"I want the committee to feel free to attack these problems of marketing without prejudice," said the minister, "and I think it should have representatives of the producers, the operative and produce interests, that it should meet from time to time and discuss the best means of marketing so as to avoid as far as possible the pressure of private interests buying commodities at bottom prices and holding them for higher prices to sell to the producers getting the best value out of them."

What was needed was more education for the producer, as to what should be produced and at what time it should be marketed, he said.

"We feel we should get the lowest freight rates from the steamship companies, but we cannot expect these companies to put their vessels at our disposal only for certain months. If we want cattle carried at the cheapest rate our supplies must be so distributed as to keep up a regular flow of cattle for export," Mr. Weir said.

"Agricultural colleges should pay more attention to marketing," the minister proceeded, "Education is the work of the provinces, yet we could add to that by bringing on or two men at federal expense and sending them through our agricultural colleges to give lectures on this subject."

The spread between what the farmer receives for his eggs and what the consumer pays occupied the attention of the House of Commons committee on agriculture.

W. A. Brown, chief of the poultry division of the Department of Agriculture, addressed the committee on the operations of his branch. He analyzed costs to show that the farmer ordinarily received about 50 per cent. of the consumer's price, the remainder going on freight, grading, wholesalers' and retailers' profits.

### Another Scientific Discovery

#### Process To Prevent Fermentation Of Frozen Fruits and Vegetables

Discovery of a process to prevent fermentation of fruits and vegetables frozen in storage, has been announced by the British department of scientific and industrial research. It has been found that if vegetables are held in a particular color and flavor will be preserved unimpaired. Boiling, it has been found, destroys the enzymes completely and permanently, leaving the vegetables in such a condition that they may be safely frozen and stored in suitable containers, either under liquid vacuum or exposed to the air.

#### Roses Bring High Price

Queen Mary sent a bouquet of roses to Christie's auction rooms for auction, the proceeds to go to the Alexandria Fund. The first bloom auctioned brought \$575. The second one brought \$520, and the following raised a succession of \$250 and \$125 offers.

In the far east, the most widely used staple fruit is the persimmon.

"Here is tinned chicken." "And haven't they put a hole in the tin for the poor bird to breathe through?"—Nagle's Lustig Welt, Berlin.

W. N. I. C.

### On the Road To Mandalay

#### Pacific Coast Salmon Firms Ready Market in Distant Climes

"On the road to Mandalay" is the slogan of some of the salmon firms of the coast of B.C., also in London, Paris, Berlin and other famous centres, canned and frozen salmon from British Columbia was successfully marketed in 1930.

All varieties of Pacific salmon were included in the export shipments, but it was found that some markets, such as Paris and Berlin, apparently preferred the frozen salmon cooked and the steamed variety. Most of the shipments were made from Victoria and were sent to the distant markets over transportation systems equipped with cold storage facilities.

For the most part the consignments were in the nature of test shipments, but the company carrying on the business reported gratifying success. It is expected that this year the field of shipment will be extended to the best means of marketing.

### Our Forest Production

#### Total Value For Last Year Is Estimated At \$219,570,129

Canada's total forest production for the year 1930, as estimated by the Dominion Bureau of Statistics, included the cutting of 3,080,614,617 cubic feet of standing timber and the resulting forest products were valued at \$219,570,129 an increase of 3.1 per cent. over the estimated value for the year 1929. The total value of total cut, at \$219,570,129, was valued at \$219,570,129 an increase of 3.1 per cent. over the estimated value for the year 1929. The total value of total cut, at \$219,570,129, was valued at \$219,570,129 an increase of 3.1 per cent. over the estimated value for the year 1929.

The chief forest products were logs and commercial importance were logs and barks valued at over \$79,000,000 and sawlogs at over \$100,000,000. Heavy railway ties, poles and square timber had an aggregate value of over \$16,000,000 and constituted the most important of the remaining items.

### Artificial Fertilizers

#### 300 Tons Of Fertilizer From Trail Plant Being Used In Sugar Beet

Area of Southern Alberta's three hundred tons of artificial fertilizers have been used in the sugar beet area of southern Alberta this season, and correspondingly large quantities are being utilized in growing other crops in other sections of the Prairie Provinces, according to Dr. R. E. Neidig, director of agriculture for the Consolidated Mining and Smelting Company at Trail. Two cars of fertilizer, which is being manufactured as a by-product of smelting operations at the Trail plant, were shipped to the Orient, early in the year, said Dr. Neidig, and tests of its efficiency in increasing crop production are being carried on in every province from British Columbia to Ontario.

### Saskatchewan Pottery Pool

#### Amount Of Business Transacted Shows A Large Increase This Year

Brick business is better doing in the Saskatchewan Pottery Pool this year, showing a marked increase over that of last year. Reports presented at the recent directors' meeting showed that from March to May 2nd, the pool handled a total of 117 carloads of bricks and some of the larger branches, at the peak, towards the end of the period, were handling four carloads weekly. "The increase in volume is general all over the province," says the report, "indicating that Saskatchewan as a whole is producing more of the product than ever before."

### Makes Card Driver

#### Deafness Is Not A Handicap In Automobile Driving

Deafness is not a handicap but in cases a positive assistance in automobile driving. Dr. Roy H. Gilchrist of Boston, told the American Federation of the "Hear of Hearing" at Chicago. "The deaf or hard of hearing driver is a careful driver, mindful of his defect and making his eyes do the work of his ears," he said. Modern traffic, he said, is largely controlled by lights and visible signals rather than by sounds, for extraneous noise prevents audible signals from being accurately heard.

### Planning Another Skyscraper

Madrid, one of the few European cities to have a skyscraper, plans to build another one. A corporation was recently formed to erect a big theatre and office building. It would be 15 stories high, or two stories higher than the National Telephone Company's building.

### Good Idea But Unattainable

#### Would Be Complete Cessation Of Book Publishing For Five Years

The perfect "Five-Year Plan for Literature" would call for a complete cessation of book-publishing for that period. Think of it! Five years of freedom from symptoms on what ails us; from books about hard-boiled guys and the "janes"; from books about Russia; from 300,000-word translations from the German; from epics of the soil; from third-rate biographies compiled from second-hand sources; from novels calling the something or other Virgin; from books on the psychology of what have you. Five years in which to return to those books which we all have been longing to read—five years in which to discover that some rather good things found their way into print before May, 1931. Five years of freedom from saying: "I guess I have to read it," and from listening to literary conversation consisting of: "Have you read it?" "Yes, it's swell!" or "Yes, I think it's heavy." But all this, alas, is an unattainable idea.—New York Times.

### A Healthy Year

#### Canadians Were Healthy If Not Wealthy In 1930

We've been healthy, but not wealthy during the year 1930, Dr. R. Vance Ward points out in the current issue of the Canadian Public Health Journal.

"As the vital statistics of various groups and communities for the year 1930 are completed, we are faced with an apparent contradiction of one of the cardinal principles of industrial hygiene," he says. "In 1930 we have taught that high wages with their associated high standards of living have brought decreased mortality and morbidity, and that, conversely, low wages and unemployment have, whenever they have prevailed, carried in their train unfavorable health conditions. Yet every-thing points to the fact that 1930, a year of industrial depression, widespread unemployment and distress, has been the healthiest that the North American continent has yet seen."

### Indians Are Great Sweepers

#### Trade Poles For Automobiles and a Island For Triangles

Stony Indians on the Morley Reserve in Canada recently swapped automobiles, garage men reporting a substantial profit in the subsequent sale of the ponies. Interesting though this incident is, it is not to be compared with the trade between the white men and which the former gave an Indian of Manhattan for beads and trinkets valued at approximately \$24.

### Low Wages and Depression

An opinion that the present business depression is due primarily to wages being too low was expressed at Ottawa by R. Mosher, president of the All-Canadian Congress of Labor. He was commenting on an address Sir Joseph Flavelle delivered at the Canadian Creditors' Association and in which he suggested a re-adjustment of wages was necessary for the re-establishment of a big.

A big elephant can lift a tree weighing a ton.

(By Annie)

CAPELET COLLAR ALF. IMPOR-TANT VOGUE FOR WEE

573

Wee fashionable have borrowed another interesting idea from the mode.

It's the bertha cape collar this time that all smart folk are wearing. It's such a pretty and quaint style for little girls of 2, 4, 6, and 8 years who like to wear sleeveless frocks. The skirt shows soft gathered fullness that permits plenty of freedom for activities for playtime.

Design No. 573 is made with 1 1/2 yards of 39-inch material in the 4-year size with 3 1/2 yards of trim. The medium used for the original Paris model is an illustration. It is a French blue dimity with white dots. The ruffling is crisp white organdie. The shoulder bow is blue grosgrain ribbon caught with tiny pink rascals on shoulder.

Pique, printed lawn, tub silk and gingham fabrics appropriate.

Pattern price 25 cents in stamps or coin (cash is preferred). Wrap orders carefully.

I feel certain you will be pleased with this popular model. And I wish to take this opportunity to call to your attention that there is a special selection of children's frocks in our new Spring Fashion Magazine. It would be a good idea to send 15 cents additional when you order this pattern. Then I'll mail you a copy of the book.

RECOVERING AIR ADVENTURE INSTRUMENTS

Dr. Charles Kipter, Swiss scientist (shown kneeling, right), is removing the precious instruments and clothing from the wreck of the huge aluminum ball in which he and his associate, Professor August Piccard, ascended to the record-breaking height of 10 miles to make observations in the "stratosphere." Professor Piccard is inside the queer ball hand'ling out articles to his assistant. The intrepid aerial explorers landed safely on glacier near Ober Gurg, Austria, in the Tyrolean Alps, where this picture was taken. The group surrounding the balloon is comprised of guides who went to the assistance of the explorers, thinking they were dead.

## Vicious Operations Of Reparations And War Debts Delaying Economic Recovery

### Establish Packing Plant

#### Saskatchewan Cattle For British Co-Operative Societies

Saskatchewan farmers are turning their attention more to the production of cattle for the British market. The Saskatchewan Co-Operative Livestock Producers, Ltd., is reported to have an agreement with British Co-Operative Societies for the shipment of live cattle and it is understood that negotiations are under way to supply these societies also with chilled and frozen products. The Saskatchewan company has purchased a building in Saskatoon and will immediately establish a packing plant. Modern machinery will be installed and will include a meat-processing plant and a chilling and refrigerating system. It is expected that the plant will be in operation within two months.

This is the first co-operative plant of the kind established by a farmer's organization in the Province of Saskatchewan. In addition to the export market which it is hoped to build up the plant will compete for local business. The location has been selected with a view to utilizing the new Hudson Bay route to Europe via the port of Churchill. First shipments are expected to go forward about the first of September.

### Trap Nest Competition

#### Results Of Alberta 100-Day Winter Trap Nest Tests Are Announced

The records of the Alberta 100-day winter trap nest test for the year 1930-31 have all been checked and the official certificates issued. The three highest are those of Mrs. Ed. Kehoe, Camrose; P. J. Delanin, Big Valley; and George Zinger, Stannum. The flock of Mrs. Kehoe, who is a director of the Alberta poultry pool, comes first with 80 per cent. of her Rhode Island Reds qualifying for 28 laid 70 or more eggs during the 100 days, and 21 laid over 30. Only seven birds failed owing to low egg weights.

### Valuable Chemicals

#### From Alkali Lakes

#### Production Of Sodium Sulphate Last Year Announced To 31,571 Tons

The alkali lakes of the Prairie Provinces have begun to add materially to the mineral production of western Canada with an increase in 1930 of well over 500 per cent. In the production of sodium sulphate. From the deposits of this material, in plentiful supply on the Prairies, only 5,018 tons were taken in 1929, but last year, according to preliminary figures of the Dominion Government, production rose to 31,571 tons.

### Salt Content Not Uniform

First shipments of Canadian butter to England have been generally satisfactory, according to word received. The flavor, taste and color of the butter have met with approval, but the lack of uniformity in the salt content has been criticized. It has been suggested that a milder and more uniform salt content, not above two per cent., be utilized in the making of the butter.

### May Act As Auditors

Directors and officers of private companies would be permitted to audit the books of their companies under an amendment to the companies act approved in the banking and commerce committee of the House of Commons. The amendment also applies to public companies which do not offer shares, bonds or debentures to the public.

The Bank of Montreal agency in New York recently received a shipment of \$2,000,000 in gold from Canada. The shipment is the first to be received from Canada since midwinter.

Clayton Scott, chief pilot for the Goret air transport, brought his Amphibian plane down onto Elliott Bay, returning from Juneau with the record of having made the first non-stop flight to Alaska by night.

## Shows Faith In Canada

## Sum Invested In Her Industries Is Over Six Billion

The impressive fact that the sum invested in Canadian industries is no less than \$6,550,000,000 is mentioned by Hon. G. Howard Ferguson, Canadian High Commissioner to Great Britain, in a foreword to the "Canadian Resources Supplement" published by the Financial Times of London, England. Still more impressive, he says, is the fact that some contributions from outside sources are held in proportion of 61 per cent. by the United States and 35 per cent. by Great Britain.

Detailing a few facts to indicate the "extraordinary resilience of Canadian industrial activities during the period of acute world wide depression," Mr. Ferguson records as another impressive fact the building contracts during the first ten months of 1930 totalled \$400,000,000. He says, "this hardly looks like fatalism or resignation to depression. Building contracts on this scale are as reliable an indication of Canada's prosperity as any that can be found."

A chair of geography has just been founded at Edinburgh University.

## St. Lawrence Route Is Popular

## Enterprise and Confidence in the Development of Canada's Future

The growing popularity of the St. Lawrence route from America to Europe has received another fillip with the placing in commission of the "Empress of Britain," said by competent authorities to be the finest vessel afloat. On her first trip from England to Canada the "Empress of Britain" carried a very notable passenger list and marked another step forward in the popularization of the St. Lawrence route to Europe.

Although not the largest passenger vessel ever launched—the "Empress of Britain" has a gross register of 42,500 tons—the new vessel is said to present the latest developments in nautical architecture, designed to insure comfort, safety and speed. Among innovations are a full-sized tennis court, a squash racquet court, long distance telephone in every first-class apartment, and every room an outside room. Her speed will enable her to make the passage between Southampton and Quebec in about five days.

The St. Lawrence route has the advantage of furnishing an ocean journey to Europe with the first thousand miles consisting of placid water enclosed by magnificent scenery. The new vessel will reduce the operational period of the voyage to 10 days. She is the property of the Canadian Pacific Railway Company, and may therefore be fairly claimed as an evidence of Canadian enterprise and confidence in the development of Canada's future.

*Jackpot*  
(By Annette)

187  
The popular jumper she'll love because of its youthfulness.

Here's a cute one, and as simple as A, B, C, to make it.

It's a lightweight woolen in rather vivid green coloring. The binding and leather belt choose a deep green shade.

The tailored gumpie is a yellow beige valuable for silk.

It's a dress that offers such a decided change to wardrobe for immediate wear. It will be found especially lovely for sports later.

Style No. 25 may be had in sizes 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100.

Wool jersey in guerdun blue with white jersey gumpie in blue.

A bladed crepe silk with plain binding crepe is extremely modern.

Crepe woolsens, linen, wool challis prints and tweed-like cloths are ideally suited to this model.

Pattern price 25 cents in stamps or cash (cash preferred). Wrap coin carefully.

Shipper: "Where are you going with your blinking ship?"  
The Other: "This isn't a blinking ship. It's a lighthouse!"—The Humorousist, London, England.

## Amend Copyright Act

## Bill Drafted To Conform With Rome Convention Of 1928

Parliament has given third reading to a bill amending the Copyright Act, approving the final three clauses in a short time. Nine clauses were passed in committee. The bill went on to the Senate.

Piloting the bill through the House, Hon. C. H. Chalmers, secretary of state, said he hoped a thorough revision of the copyright law might be undertaken but indicated it would require "a great deal of time."

The bill is drafted in order to bring the present copyright law into conformity with the Rome convention of 1928, and Canada is required to deposit this country's adherence to that convention by July 1. In general its purpose was to extend the provisions of the copyright so as to embrace radio broadcasting and cinematograph reproductions, those developments not being in existence when the original Berne convention was drafted. As the bill operates, individuals who have not registered their works will not possess the right of suit in court in respect of such unregistered works. In the case of assignment having been made, only such assignments as have been registered will vest in the assignee whatever court rights are established. Unregistered assignments will have no status before the courts.

Organizations to whom copyrighted works have been assigned and who charge fees for the performance of such works will be subjected to government regulation if, after an enquiry by a commissioner under the Esquires Act, it is shown that excessive fees are being charged or that the organizations are operating detrimentally to the public interest.

## Oil Production In Alberta

## April Showed Fifty Per Cent. Gain Over Same Month Last Year

Oil production in Alberta for the month of April was more than 50 per cent. ahead of the same month last year. According to figures given out by Hon. R. G. Reid, Minister of Lands and Mines, the four producing fields in the province gave a yield of 42,544 barrels, as against 92,491 barrels in April of 1930. The heaviest item in the month's production was 129,233 barrels of naphtha from the Turner Valley wells, this alone being an advance of nearly 50,000 barrels over the corresponding month of last year. Turner Valley made 92,491 barrels of light crude oil, while light crude from Red Coulee was 6,800 barrels. The total production of the province was 1,306 barrels, and Ribstone 207 barrels.

## A Real Patriot

It was a beautiful Sunday morning, Simpson, having finished reading a paper printed with an invective against Germany, set out with his wife for the meeting house of a faith found in Palestine. Contemplating the beauty of the land, which had been discovered by an Italian in the employ of a Spanish queen and missing on the liberty, he possessed thanks to the help of a French navy, his bosom swelled with pride. "Thank God," said Simpson fervently in a language improved from the British Isles, "I am an one-hundred-per-cent. American."

Forest service officers are watching the development of improved types of car arresters which are designed to prevent sparks from locomotives from starting fires.

## JESUS THE WORLD SAVIOUR: SUFFERING AND SOVEREIGNTY

Golden Text: "God so loved the world, that He gave His only begotten Son, that whosoever believeth in Him should not perish, but have eternal life."—John 3:16.

## A Review By Means Of Allusions

By questions recall the lesson to which each allusion refers.  
Lord, grant us grace to love Thee so,  
That glad of heart and glad of face,  
At last we may sit high or low,  
Each in His place.

—Christina Rossetti.

It requires a well-kept life to do the will of God, and even a better-kept life to do His will. It is the will of God that we should be holy. "One went to pray," or rather say, "One went to work, and the other to pray."

Let any forlorn creature happen along that looked as if it hadn't a friend in the world, and Aunt Matilda was for taking it in, putting the best robe upon it, and giving it the best bit in the cupboard.—G. L. Trevelyan.  
With canine loyalty I wagged an enormous tail, and accepted my one-third of the crumbs that had fallen from the table of the proud.—C. E. M. Maguire.

But they never really saw Him, they never understood Him. Their hearts were never His. It was their lips and just their lips, said "Hallelujah!"—Frank Kingdon.

Again and again I have been tempted to give up the struggle, but always the figure of that strange man, the man who had crossed the sea to my task again.—George Tyrrell.  
"Stone upon stone rear we churches finer and finer than ever are they. How we do honor Him!" proudly we say.

But Christ said, "Go ye!"  
Each meal should be a sacramental feast.  
A Eucharist each breaking of the bread.

Wherein we meet again our Great High Priest,  
And pledge new troth to our exalted Head.

—John Oxenham.  
Thy nature is not less divine;  
Thou liest in Abraham's bosom all the year.—Wadsworth.

He had quite a long run in the role of the Importunate Woman and, like her, he got there at last.  
—C. E. Montague.

Both think of thy Lord,  
Who bled again the smitten ear.  
And sheathed His follower's sword.

—Whittier.  
Airplane Speed Records  
Within the next ten years aeroplanes will be able to fly twelve or fifteen miles above the earth where speeds of more than 1,000 miles an hour are conceivable, says Capt. J. H. H. Lawrence, British flyer, in citing the possibilities of a trip around the world in twenty-four hours. However, one must take into account one drawback—the fact that the higher one flies, the greater is the distance around the earth.

The largest library in the world is in Paris. It has 2,600,000 volumes. The Congressional library is the largest in the United States.

Such lather! Such refreshing fragrance, such skin softening and cleansing!

## Gandhi Prefers Humble

## Quarters in London

## Chooses To Live In Garret Among the Poorer Class

Mahatma Gandhi, who will leave India about the middle of August to attend meetings of the federal structure committee in London, England, has decided that when he gets there he will live among the most humble mendicants of Kingsley Hall, London's east-end home for the poor.

Other delegates to the round table conference install themselves in the city's hotels or the castles of their friends, he will be in a garret, and he will be surrounded by those familiar to the people who reverse him so highly at home.

If the foreign permits he will not even alter his habitual costume of white shawl and thin cotton kni cloth, but if it is cold he will wear a homespun coat and the conventional European trousers. When he appears before the King and Queen it will be in the Indian costume with shaven head and bare feet.

Despite the problems of state with which he is concerned, one of his major considerations at the moment is how he will obtain fresh goat's milk in London, England, and on the way there. Contrary to reports he cannot make his own flock of goats which are milked twice daily in his presence, and it is likely he will instruct Miss Slade, his British attendant and disciple, to take along a supply of condensed milk.

**Larger Boats On Welland Canal**  
Boats up to 450 feet in length will be allowed to pass through the Welland Ship Canal, commencing this month, Chief Engineer Alex. Grant announced. Previously regular passage has been restricted to boats of the St. Lawrence size, 257 feet, any boats in excess of that have required a special pass. This new regulation will cover all classes of vessels, Mr. Grant announced, but the restriction to 16 feet draught will remain in force.

## WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE  
MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free of leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

## About Town and Country

**STORES CLOSE AT 1 P.M.**  
Wednesdays June and July

Shortly after 4 p.m. last Monday, the tolling of the fire bell brought residents of the village out to the fire hall in record time, but a telephone call that the danger was over, saved the brigade an unnecessary trip with the chemical engine. A gasoline stove at the home of Mrs. W. D. Morrell flared up and threatened to set the house on fire and an alarm was accordingly turned in. The stove was afterward thrown outside and further danger averted.

Mr. Harold McDonald returned Oyen last Wednesday after accompanying his wife to Calgary where she will be a patient at the Keith Sanatorium.

**District Gets Nice Rain,  
But More Moisture is Needed**

Following the extremely hot weather of the fore part of last week, relief came Thursday with cooler temperatures and light showers which totalled .17 inch by 6 o'clock in the evening. Showers continued thro the night and on till Friday afternoon for a total of .36 inch. A further short heavy shower on Saturday evening added another .13 inch, bringing the total precipitation for June to .56 inch.

Considering the light rainfall for the present season—April .36, May .55 and June (to date) .56—crops are still looking fair, but general rains are urgently needed to bring them along. The precipitation this season to date is the lowest for many years.

Mr. and Mrs. G. S. Peek returned to Oyen today after an absence of two months. Most of the time they were away, they spent in the Peace River country, but during the latter part of trip, spent a delightful visit in Jasper Park.

Dr. J. P. Kerr, who was a business visitor in Calgary last week, returned to Oyen Sunday.

### Tonsil Clinic

Dr. McGregor and Esler will hold a clinic for the removal of tonsils, in the old hospital building, on Friday, July 3, at Government Clinic rates. Patients must come in for examination previous to the day of clinic.

Mrs. F. W. Grant and son Jimmy, are guests at the home of Mrs. J. Love. They arrived in Oyen from Munson last Friday.

Farewell Social to Rev.

and Mrs. H. C. Woods

A farewell social to Rev. and Mrs. H. C. Woods, who are leaving Oyen after four years of service here, to go to Rockyford at the end of the month, was held in the United Church basement, last Friday evening.

At the conclusion of a novel and entertaining program arranged by Mrs. A. O. MacArthur Mr. and Mrs. Woods were presented with a handsome floor lamp, by the congregations of the Oyen Pastoral Charge, the presentation being made by Mr. Chas. L. Dunford. Mr. and Mrs. Woods were visibly touched and each said a few words in thanks.

Following the presentation, refreshments were served and a social hour pleasantly spent.

Rev. E. F. Kemp, of Big Valley, who succeeds Rev. Woods will be in Oyen for the first Sunday in August. Services during July, have been arranged.

### M. D. Golden Centre

(Continued from page 1.)

By-law No. 51 was read three times and adopted, authorizing the following grants: Salvation Army, \$100.00; Oyen Agricultural Society, \$50.00; Chinook Agricultural Society, \$37.50; and \$5.00 to each school district participating in a school fair.

The pound on the S.W. 24 30-5 was moved to N<sup>1</sup>/<sub>2</sub> 22 30-5, and Thomas Barker, was appointed poundkeeper.

The financial statement to May 29, was read and accepted. The corral at the Walper pound was sold to L. A. Walper for \$30.00.

Council adjourned to meet at the N.E. 13 30 3, on Saturday, July 4, at 10:00 a.m.
